Atica Stretcher

Columns	Hydraulic

214	77	60 - 92	4
Max. length	Max. width	Height	Num. of bed bases

TR / ATR	Cardiac chair

| 310 kg	270 kg
SWL	MPW

Features

Four articulated panels with hydraulic drive system transfers stretcher. It has a rolling system with four 200mm wheels for agile and comfortable transfers.

It has a complete accessories kit to make it versatile in any hospital area.

Some of its main characteristics are:

- Folding rails;

  These folding rails have 140 cm. long and provide side protection for patient greater safety.

- Bed base;

  The bed base is made of easy cleaning phenolic material. Anchorage zones for segufix belts. Bed base dimensions 190 x 65 cm.

  Bed base lifting: step repeatedly on the pedal until the desired height is reached. To lower the bed, raise the central pedal with the foot.

  Maximum lift height: 92 cm.

  Minimum lift height: 60 cm.

- Trend / Reverse trend;

Independent pedals for Trendelenburg and Reverse Trendelenburg positions.

20º tilting degrees for both positions.

- 5th wheel (Optional);

  It remains inactive as long as is not needed.

  It is controlled from the braking pedal.

- Chair position;

  The bed base tilt along with the backrest and footrest operation, allows the chair position of the stretcher.

- Lower fairing;

  It is made of plastic with a smooth surface and easy cleaning. It has a central space for tank holding and two side areas to leave patients personal belongings.

- Accesories;

  Folding monitor holder table.

  Rolls holder.

Atica Stretcher

Technical information

Total length with headboard and footboard	2143 mm. ± 10 mm.
Total width with rails	778 mm. ± 10 mm.
Minimum bed base height (without mattress)	600 mm. ±10 mm.
Maximum bed base height (without mattress)	920 mm. ±10 mm.
Dimensions of the mattress	650 x 1900 x 80 mm.
Backrest tilting angle	90º ± 2º
Trend / Anti-Trend position angles	20º/20º ± 2º
Maximum patient weight (MPW)	270 kg.
Safe working load (SWL)	310 kg.
Safety load of the IV pole	2 kg. by hook.
