

**LOCKER  
COD. AS303**

Structure made of single sheet multilayered laminate.  
 Provided with 4 ventilation slits both to guarantee an high ventilation and for a complete cleaning and leak of liquids.  
 With sloping roof.

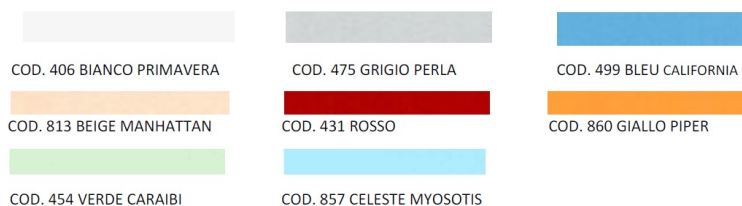

Doors made of 8 mm laminate; they slide completely inside the structure to avoid any chances of malicious damage.  
 They are fixed on hinges made of extremely highly resistant and self lubricating nylon. Their tightness and perfect positioning on the shutter, ensure a maintenance free operation. Their opening up to a maximum of 135° enables optimising of the space inside the locker compartment.  
 Provided with nickel plated brass locking system with double key.

Base on 4 steel feet, 200 mm high.

Each compartment is internally equipped with fixed partition, 1 upper and 1 lower shelf and 1 aluminium coat hanger rod with cloth hangers.

Dim.

**Position 1**
